

Agras T50 Base Package

- Agras T50
- DB1560 Intelligent Flight Battery x 3
- C8000 Intelligent Battery Station
- DJI 65W Charger
- WB37 Intelligent Battery
- WCH3 Charging Hub
- AC cable for Battery Station x 4

\$36,699

Agras T50 Full Package

- Agras T50
- T50 Spreading System
- DB1560 Intelligent Flight Battery x 3
- C10000 Intelligent Battery Station
- Half Replacement Propeller Set
- DJI 65W Charger
- WCH3 Charging Hub
- WB37 Intelligent Battery x 2
- AC cable for Battery Station

\$39,879

Agras T50 Pro Package

- Agras T50
- T50 Spreading System
- T50 Atomizer Sprinkler Package
- DB1560 Intelligent Flight Battery x 4
- C10000 Intelligent Battery Station
- D-RTK 3 Multifunctional Base Station
- D-RTK 3 Survey Pole and Tripod Kit
- DJI Relay Module
- Half Replacement Propeller Set
- DJI 65W Charger
- WCH3 Charging Hub
- WB37 Intelligent Battery x 2
- AC cable for Battery Station x 2

\$48,471

The world's leading spraying drone to your farm fleet, supported locally by RME's Precision Specialist. Benefit from local parts, repair, and training in partnership with LandView Drones, which has 10 years of experience with DJI agriculture drones.

Precision. Efficiency. Flexibility.

NOTE: The Agras T50 has a maximum takeoff weight of 105 kg. It requires an Advanced Certificate from Transport Canada to operate, and a Special Flight Operations Certificate for the 2025 crop season. Regulatory changes will take effect on November 4, 2025 – please contact us for details. Additionally, only a few pesticides have been approved for drone application by the Pest Management Regulatory Agency. It is the responsibility of the Pilot in Charge to ensure compliance with all regulations.

Your Precision Ag Partner*

dji AGRICULTURE

WHY CHOOSE THE AGRAS T50?

- High Capacity: 40 Litre tank for extended spraying sessions.
- Precision Control: Advanced RTK system for centimeter-level accuracy.
- Access: Easily handles rough uneven terrain that traditional sprayers can't access.
- Fast Coverage: Cover large areas quickly, average of 35-40 acres/hr.
- Smart Mapping: Automate routes and optimize spraying patterns for maximum efficiency.
- Environmentally Friendly: Minimize chemical use with precise targeting, seed cover crops.

DJI AGRAS T50

Take Your Spraying Operations to New Heights!

The Agras T50 is the latest innovation in agricultural spraying, built for farmers who demand high performance and reliability. Ideal for fertilizer spraying, pasture rejuvenation, and targeted applications across Western Canada.

Schedule a demonstration with Rocky Mountain Equipment to learn about the Agras T50's capabilities for spraying operations. The Agras T50 is available at RME locations throughout Western Canada. Training and customer support are available through a partnership with LandView Drones, which has over 10 years of experience selling DJI agricultural drones.
